Projects

ParkAfrica – Smart Parking Management System

[Link](#)

ParkAfrica is a real-time smart parking management platform for companies to register and manage their parking operations in one system. It streamlines access and transactions across multiple parking areas in 20+ countries with support for 4 languages. [Currently working with 7 Companies in Rwanda]

Togetha – A Real time space where teams sketch, plan, and share ideas

[Link](#) [Github](#)

Togetha is a real-time collaborative whiteboard where ideas come to life. Whether you're planning projects, sketching concepts, or organizing thoughts, it offers a clean and intuitive space for teams to work together seamlessly from anywhere. [Currently having over 100+ Users and 20+ Teams]

Inzu Link – Property Management System

[Link](#)

Inzulink is a real-time property management platform that enables companies to manage properties, units, lodges and tenant operations in one system. It streamlines tracking, communication, and transactions through a secure and user-friendly interface. [Currently working with 5 Companies]

BRAIN PAGE – Library Management System

[Link](#) [Github](#)

This is a modern Library Management System built with Next.js and Django, featuring an elegant and intuitive UI for managing books, members, and borrowing records with ease.

Velora – Online E-commerce Store

[Github](#)

Velora is a sleek and modern e-commerce web app designed for a seamless shopping experience. Built in Django with speed, style, and usability in mind, it lets users browse products, manage carts, and checkout effortlessly through a beautifully crafted UI
