Projects

Malos Haven – Property Management System

A web-based platform that allows landlords and property managers to manage multiple properties, units, and tenants efficiently. It includes features for adding and updating properties, tracking unit occupancy, managing tenant information, handling maintenance requests, and viewing property analytics in a clear and organized dashboard.

Malos Flix – Movie Database Web App

A user-friendly movie database and streaming interface that allows users to search, discover, and view details about movies, series, and anime. The platform features dynamic search, categorized recommendations, and detailed movie pages with information such as plot, cast, ratings, and release date. Designed with a modern UI to enhance the browsing and viewing experience.

Tasty MUNDO – AI Powered Recipe Generator

An intelligent recipe generator that creates personalized meal ideas based on user-provided ingredients. The platform leverages AI to suggest diverse recipes, offering detailed cooking instructions and ingredient breakdowns. Crafted with a clean, intuitive design to simplify discovering and cooking exciting dishes.

NIVRA – Weather Forecast App

A modern weather forecasting platform that provides real-time and accurate weather updates for any location. It features location-based search with autocomplete, detailed forecasts for the day and week, and smart recommendations such as daily highlights. Designed with a clean and intuitive interface, NIVRA ensures users can quickly access the weather insights they need at a glance.
